Since all of these calls have been handled, go ahead and give it a try.

We rarely receive FAX messages, but if we do, the same phone # is used, Accessline identifies the incoming message as a FAX, and will add it to the FAX message list.

If a message is deleted here before you get to listen to the link sent in your email, it will reply with a message not found error. You ran into that once when I deleted a spam message.

Enjoy!
Gary
